SQL ANALYTICS PORTFOLIO PROJECT

Olist E-Commerce Growth & Operational Performance

An executive evaluation of marketplace revenue concentration, delivery performance impact on satisfaction, and customer retention metrics.

DATA SCOPE
100k Orders (2016–2018)

CORE FOCUS
Revenue, Logistics & Retention

EXECUTIVE SUMMARY

Marketplace Growth Driven by High Geographic Concentration

Key strategic takeaways across revenue dynamics, delivery fulfillment, and buyer repeat rates

Revenue Trajectory

Revenue scaled over 10× from Jan (18k) to Nov peak (211k, 1,552 orders) before seasonal pullbacks. 63% of gross sales originate from just 3 southern states.

Logistics & Reviews

Late deliveries (6.5% overall) severely punish customer ratings, dropping review scores from 4.30 for on-time orders down to 1.67 for severe delays.

Customer Retention

Repeat buyer rate sits at a critical low of 3.0% (269 of 9,000 buyers). Average repeat window is 46.2 days, showing acquisition reliance over retention.

PILLAR 1: REVENUE CONCENTRATION

Monthly Revenue Expansion & Seasonality

Significant scale expansion culminating in November surge followed by December correction

NOVEMBER PEAK

$211,000

1,552 Orders

November represents the peak operational order volume and revenue output across the timeline.

DECEMBER RETRACTION

-26.7%

Post-Holiday Drop

Sharp decline in December following Black Friday / holiday volume slowdown.

STARTING BASE (JANUARY)

$18,000 Revenue

Baseline monthly performance at start of observed period.

OVERALL GROWTH MULTIPLE

11.7x Growth

Expansion factor from January baseline to November peak.

PILLAR 1: PRODUCT DISTRIBUTION

Category Revenue Leadership

Bed Bath Table leads overall sales, while Garden Tools & Auto lag behind

Top Performing Categories

1. Bed Bath Table — $108,102.44
2. Health Beauty — $106,260.17
3. Watches Gifts — $101,821.11

Lower Revenue Categories

Garden Tools — $52,739.09

Auto — $52,573.38

Top 3 categories earn roughly double the total volume of bottom-tier categories like Auto and Garden Tools.

PILLAR 1: CONCENTRATION RISK

State Revenue & Seller Concentration

High dependence on Southeast regional hubs and key market sellers

Top 3 States Control 63% Revenue

Marketplace sales are heavily concentrated in 3 southern states:

36%	15%	12%
São Paulo (SP)	Rio de Janeiro (RJ)	Minas Gerais (MG)

São Paulo alone generates over one-third of all platform GMV.

Top 10 Sellers Drive 20% Sales

4% Top single merchant share

1% Share of lower top-10 tier sellers

Moderate seller concentration ensures platform stability without extreme dependence on a single merchant.

PILLAR 1: PAYMENT DYNAMICS

Credit Card Dominance & Basket Size

Credit card payment options drive both order volume and higher average checkout values

DOMINANT PAYMENT TYPE

Credit Card

76.98%
Share of Total Orders

7,156
Total Orders

$162.31
Avg Payment Value

LOWEST ADOPTION

Debit Card

0.78%
Order Share (73 orders)

$95.66
Avg Payment Value

PILLAR 2: DELIVERY & SATISFACTION

Regional Logistics Transit Times

Overall 6.5% late delivery rate driven by massive geographic transit discrepancies

LATE DELIVERY BASELINE

6.5% Late

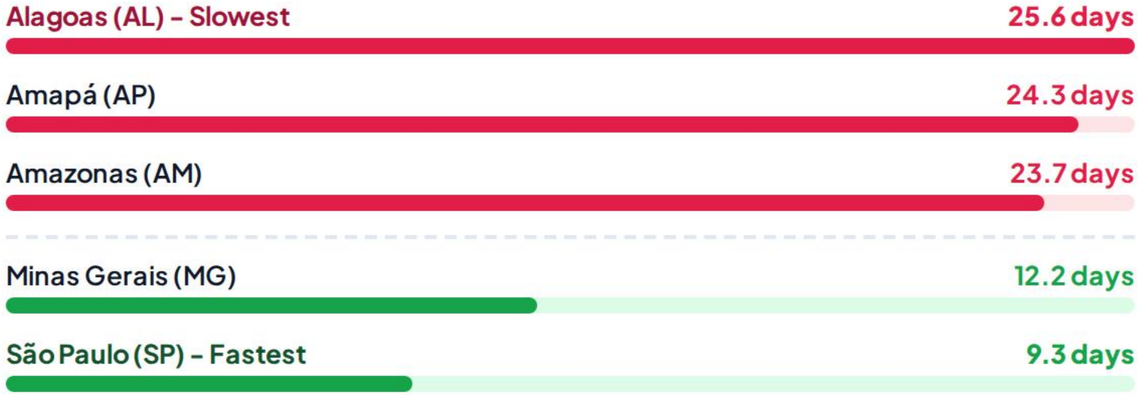

602 out of 9,300 total analyzed orders missed estimated delivery dates.

HIGHEST LATE RATE STATE

14.5% Late

Bahia (BA) leads the nation in delayed shipments, followed by PE (12.9%).

Average Delivery Days by State

PILLAR 2: CUSTOMER SATISFACTION IMPACT

Delivery Delays Severely Degrade Reviews

On-time delivery preserves 4+ star ratings, whereas delays trigger massive score drops

ON-TIME ORDERS

4.30

Average rating for punctual orders

LATE ORDERS OVERALL

2.65

Severe Average Score Drop (-38.4%)

PILLAR 2: DELAY DECAY CURVE

Review Score Decay Timeline

Satisfaction collapses quickly beyond 3 days of delay

1 TO 3 DAYS LATE

3.42

Minor frustration; score drops below 4.0

4 TO 7 DAYS LATE

2.20

Significant dissatisfaction sets in

8 TO 14 DAYS LATE

1.67

Critical score drop to bottom tier

15+ DAYS LATE

1.20

Near total loss of customer goodwill

PILLAR 3: CUSTOMER RETENTION

Low Repeat Purchase Baseline

The platform operates primarily as a one-time transaction channel

REPEAT PURCHASER RATE

3.0%

Only 269 out of 9,000 customers ordered again

AVERAGE REPEAT GAP

46.2 Days

Average elapsed time between customer first and second orders.

TIME RANGE SPREAD

0 to 312 Days

Min repeat interval is same-day; max interval spans nearly a full year.

PILLAR 3: RETENTION OPPORTUNITIES

Repeat Rates by Category & Geography

Furniture Decor & Pet Shop exhibit substantially higher repeat potential

Highest Repeat Categories

Furniture Decor
Highest category stickiness
8.1%

Pet Shop
Consumable repeat purchases
7.4%

Repeat Rates Across Key States

Geographic variance in repeat purchase behavior remains narrow:

Rio de Janeiro (RJ)	3.8%
Bahia (BA)	3.7%
São Paulo (SP)	3.1%

STRATEGIC RECOMMENDATIONS

Actionable Plan to Drive Growth & Retention

01

Logistics Regionalization

Establish regional fulfillment centers in BA & Northeastern states to reduce 25+ day transit times and eliminate review penalties.

02

Category Re-engagement

Target high-repeat potential categories (Pet Shop, Furniture) with automated lifecycle triggers around day 30–45 post-purchase.

03

Geographic Expansion

Diversify revenue beyond SP/RJ (63% share) by offering localized shipping subsidies in high-growth secondary markets.
